### **Differentiators**

We have invested in industrial grade equipment which removes hundreds of square feet of flooring in a few hours. We lift the floor covering, perform dust containment, and haul away debris. We remove ceramic tile, VCT, carpet, glued down hardwood, marble, and epoxy. No job is too big for our crew and equipment. We have removed 2 ½ million square feet of flooring material in the last four years.

If needed, we can also shot blast or grind the concrete slab to prepare it for new floor coverings. We are licensed and willing to travel throughout northern California and the Reno/Sparks area in Nevada. We have the equipment and experience to leave the surface clean, dry, and ready for new floor coverings.

### **SPECIAL EQUIPMENT**

3 National Panther 5200 Floor Removal Machines  
2 Large Propane Floor Removal Machines  
Diamond Grinder 480 3phase  
Vacuum/Dust Collection System 480 3phase  
Diamond Grinder 277 3-phase/240 single-phase  
22" Concrete Surface Shot Blaster 480 3phase
